

FloorGUARD

The most cost-effective floor protection solution.

Nilkamal **BubbleGUARD** brings to you a series of floor protection boards that safeguard your expensive floorings like Italian marble, marbonite, tiles and granites from scratches, spillage and falling materials during construction and renovation. **FloorGUARD** is a quick and economical floor protection solution.

The scientifically engineered honeycomb structure creates a soft air cushioning that ensures your floor is protected from falling debris or scratches during material movement. The air-lock technology makes it durable and reusable multiple times.

Measure and cut to the size required

2

Apply tape to seal joints and the site is ready to use

3

Once done remove tape and stack for future use

4

The floor remains clean and tidy without any damage

5

Added benefits over conventional floor protection:

Attributes	POP	Nilkamal FloorGUARD
Time Required	Slow. Site takes minimum 5 hours to be work ready	Fast. Site is ready to use immediately
Cost	Expensive	Economical. Lower cost per sq. ft.
Liquid Protection	Low - as POP is water based	High - as the material is waterproof
Site Condition	Wet & messy with POP dust	Dry & clean
Durability and Re-usability	Short. One time application	Multiple time use
Labour Skill Level	Requires skilled labour	Special skills not required
Handling	Heavy, thus difficult to handle	Lightweight & compact making it easy to handle
Removal and Disposal of Debris	Time consuming and labour intensive. Cost of disposal is extra	Quick and no special labour required and does not leave debris
